

Two-factor authentication login

Zwitserleven employers

When you log on to MijnZwitserleven, we ask you to set up what's known as two-factor authentication. This ensures even better security for your account. With just one additional step, only you can access your account, even if someone else knows your password. We'll gladly walk you through how it works in the steps below.

To further secure your account, we require you to log on using two-factor authentication. This involves a combination of your password and a code on your smartphone.

Authenticator app

For extra secure login, use an authenticator app on your phone. Don't have an Authenticator app yet? Scan one of the codes you'll see on the next page to download an Authenticator app. Heads up! If you already have an Authenticator app, skip the first QR code, click "next," and follow the on-screen instructions.

Have you successfully installed the Authenticator app? Then next time you log on to MijnZwitserleven, you'll first enter your username and password. Then, you'll fill in the token from your Authenticator app linked to your Zwitserleven account. You're now logged in with two-factor authentication.
